

WorkFlow Global HRMS - Training & Development Module

Generated: 2026-06-23 15:33:06

1. Training Module Overview

The Training & Development module provides a comprehensive e-learning platform for employee skill development, compliance training, and professional growth. It tracks course progress, issues certificates, and manages mandatory training requirements.

Key Features:

- E-learning module management with progress tracking
- Certificate issuance upon 100% completion
- Mandatory vs optional training designation
- Multi-category training (Technical, Compliance, Soft Skills, Leadership)
- Course content organization with module tracking

2. Domain Model

TrainingModule Entity:

```
public class TrainingModule : BaseEntity
{
    public string Title { get; set; }
    public TrainingCategory Category { get; set; }
    public int Duration { get; set; }
    public bool Mandatory { get; set; }
    public TrainingStatus Status { get; set; }
    public decimal ProgressPercentage { get; set; }
    public string? Description { get; set; }
}
```

3. GraphQL API

Queries:

getMyTrainingModules - Fetch assigned training courses

Mutations:

completeTrainingItem - Update course progress and issue certificates

4. Certificate Issuance Logic

When a training module reaches 100% completion, the system automatically flags it for certificate issuance. The frontend displays a download button for completed courses with certificates.

5. Frontend Features

- Grid layout displaying all assigned training modules
- Category and mandatory badges for quick identification
- Progress bars with percentage indicators
- Certificate download for completed courses
- Detailed module view with content breakdown
- Visual progress tracking through course sections
