

# WorkFlow Global HRMS - Company Announcements Module

Generated: 2026-06-23 15:33:07

## 1. Announcements Module Overview

The Company Announcements module serves as a central communication hub for organizational updates, policy changes, and important notices. It supports priority-based messaging, targeted visibility, and compliance acknowledgements.

### Key Features:

- Priority-based announcement system (High, Medium, Low)
- Category organization (Policy, General, Company News, Training)
- Visibility scoping (Global, Department, Location)
- Compliance acknowledgement tracking
- Expiry date management for time-sensitive announcements
- Rich content support for detailed communications

## 2. Domain Model

Announcement Entity:

```
public class Announcement : BaseEntity
{
    public string Title { get; set; }
    public AnnouncementCategory Category { get; set; }
    public string Content { get; set; }
    public AnnouncementPriority Priority { get; set; }
    public VisibilityScope VisibilityScope { get; set; }
    public string? CreatedBy { get; set; }
    public DateTime? ExpiryDate { get; set; }
    public string? TargetDepartment { get; set; }
    public string? TargetLocation { get; set; }
}
```

## 3. Priority System

Announcements are sorted by priority:

- High Priority - Critical updates requiring immediate attention
- Medium Priority - Important but not urgent communications
- Low Priority - General information and updates

## 4. Acknowledgement System

Policy and Training category announcements require employee acknowledgement. The system tracks who has acknowledged each announcement for compliance reporting.

## 5. GraphQL API

### Queries:

getAnnouncements - Fetch active announcements sorted by priority

### Mutations:

- createAnnouncement - HR/Admin creates new announcements
- acknowledgeAnnouncement - Employees acknowledge receipt

## 6. Frontend Features

- Priority-based visual indicators with color coding
- Category badges for quick identification
- Acknowledgement status tracking
- Creation modal for HR/Admin users
- Detailed view modal with full content
- Expiry date display for time-sensitive announcements
- Visibility scope indicators

## 7. Use Cases

- Policy updates requiring employee acknowledgement
- Company-wide announcements (new office, leadership changes)
- Department-specific communications
- Mandatory training notifications
- Holiday schedules and office closures
- Emergency notifications
