

WorkFlow Global HRMS - Part 9 Modules

Generated: 2026-06-23 16:08:43

Recognition & Contributions Module

The Recognition & Contributions module enables peer-to-peer recognition aligned with company core values. Employees can nominate colleagues for exceptional work, and managers can approve nominations to award recognition points.

Key Features:

- Peer-to-peer recognition system
- Core value alignment
- Points-based rewards
- Manager approval workflow
- Public recognition feed
- Employee points tracking

Backend Implementation

Domain Entity:

```
public class RecognitionNomination : BaseEntity
{
    public string NominatorId { get; set; }
    public string NomineeId { get; set; }
    public string CoreValue { get; set; }
    public string Reason { get; set; }
    public int Points { get; set; }
    public NominationStatus Status { get; set; }
    public string? ApprovedBy { get; set; }
    public DateTime? ApprovedOn { get; set; }
}
```

GraphQL API:

Queries:

- getRecognitionFeed: Returns approved nominations
- getMyRecognitionPoints: Returns employee points

Mutations:

- nominatePeer: Creates peer nomination
- approveNomination: Approves pending nomination
