

WorkFlow Global HRMS - Part 9 Modules

Generated: 2026-06-23 16:08:44

Team Directory & Org Chart Module

The Team Directory & Org Chart module provides comprehensive team management capabilities including employee directory with search, organizational hierarchy visualization, and team status tracking.

Key Features:

- Comprehensive employee directory
- Advanced search and filtering
- Hierarchical org chart visualization
- Real-time status tracking
- Manager-report relationships
- Department-based views

Backend Implementation

Domain Entity:

```
public class OrgNode
{
    public string EmployeeId { get; set; }
    public string EmployeeName { get; set; }
    public string Position { get; set; }
    public string Department { get; set; }
    public string? ManagerId { get; set; }
    public List<OrgNode> DirectReports { get; set; }
}
```

GraphQL API:

Queries:

- getTeamDirectory: Returns filtered team members
- getOrgChart: Returns org hierarchy

Frontend Implementation

Team Features:

- Team status board showing direct reports
- Dynamic org chart with hierarchical rendering
- Search and filter capabilities
- Employee status indicators (Active, On-Leave, In-Meeting)
- Fluid transitions and animations

Org Chart Algorithm

The org chart uses a recursive algorithm:

- 1. Start with root employee
- 2. Find all direct reports
- 3. Recursively build subtrees for each report
- 4. Return complete hierarchy structure
